Annual General Meeting

15th November 2026

Webmasters Report

Our web site continues to be well used both by members of our group and also by other user to view and download our extensive library of walk tracks and ideas.

The **Page Views** table shows the most popular areas of our site and lists the number of views for each so far this year.

Walk Programme & Bookings includes all the pages related to viewing the programme, walk submission and walk bookings. Similarly, the events and holiday figure includes viewing and booking of all holidays, coach trips and the Christmas lunch.

The **Downloads** table shows a breakdown of the number of downloads taken from the site. It shows that our walking routes/tracks are a popular download source.

Ignoring the home page visits, page views are roughly comparable between 2025 and 2026 whilst downloads have increased.

The site runs on Joomla 5 which has now reached end of support. An upgrade to Joomla 6 awaits the go ahead from Ramblers-Webs.
